

**Chesapeake
Region
Safety
Council**

Alive at **25**[®]

A highly interactive course that helps young drivers under the age of 25 to take greater responsibility for their driving by focusing on behavior, judgment and decision making. This course is an excellent complement to national driver training programs that traditionally focus on state laws and vehicle and road handling.

Motor Vehicle Crashes are the Number One Cause of Death for Young Adults aged 15 - 24

This course meets the Maryland MVA requirements for those that are required by court to attend a Driver Improvement Course.

NSC Driver Safety Training Course Features

- Proven, effective facilitation methods for teens learning to drive and young adults who drive as part of their job responsibilities
- Defensive driving techniques to help young adults drive safe and more responsibly
- New direction for traffic violators by helping them change driver attitudes and behaviors
- Coping techniques addressing peer pressure, distractions, cell phone use, and driving hazards before those instances occur
